CAREER OBJECTIVE

Final-year Software Engineering student with experience developing web and mobile applications using React Native, Firebase, JavaScript and MongoDB. Experienced working in agile teams and collaborating with stakeholders to deliver software solutions. Seeking an Undergraduate Software Engineering role to develop my engineering and technical problem-solving skills.

EDUCATION

University of Technology Sydney

Bachelor of Engineering (Honours) – Software Engineering
Diploma in Professional Engineering Practice

Feb 2022 – Dec 2026 (*Expected*)

WORK EXPERIENCE

Backend Developer

UTS Work Experience

Feb 2024 – June 2024 (*2y 5mo*)

- Collaborated with a team of 7 software developers to create and deliver a React Native mobile application using Firebase services.
- Conducted functional testing and validation of audio and application settings to ensure high quality and robustness.
- Participated in weekly agile stand-ups with stakeholders to gather requirements, communicate progress and ensure the project aligned with expectations and maintained scope.

PROJECTS

Property Chatbot | [GitHub](#)

- Developed an AI powered property chatbot using Python and Streamlit to provide interactive property search and recommendation functionality.
- Developed a RAG pipeline connected to an NSW property database to retrieve relevant property data.
- Integrated the Ollama Qwen2.5 LLM to generate context aware responses for location specific questions and recommendation requests.

Study Bot – AI Chat Assistant | [GitHub](#)

- Developed a full-stack web application using React, Node.js and Express to provide an interactive AI-powered study assistant.
- Integrated the Open AI API through a backend Express server to enable real-time AI responses customized to a user's study-related queries.
- Designed and implemented a chat-style user interface using React to render user and AI-generated messages.
- Engineered prompts to optimize AI responses towards educational and study-related interactions.

Baby University – Educational Mobile Application | [GitHub](#)

- Developed a React Native mobile application with interactive book navigation through touch and swipe-based page navigation.
- Integrated audio functionality using asynchronous JavaScript operations to sync page narration and sound effects with user interactions.
- Integrated Firebase Authentication and Firestore database services to support user login and credential management.
- Evaluated and integrated third-party React Native libraries to deliver application functionality and improve development efficiency.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C++, C#, SQL

Frameworks and Technologies: React, React Native, Node.js, Express, Firebase, MongoDB

Tools: Git, GitHub, Docker, Jira, VS Code
